

Cloud Consultants – OpenShift

We are looking for Cloud Consultants to join us for project deliveries and longterm engagements in EMEA region. In this role, you will be primary responsible for the on-site delivery and implementation of the Red Hat OpenShift platform.

You're understanding the customer needs for digital innovation and transformation with a focus on Red Hat OpenShift. According to your expertise you are able to make recommendations appropriate to customers environment for creating proper solutions to resolve their needs.

As a Cloud Consultant, you'll need to have advanced knowledge and experience with IT Infrastructure concepts, Linux and Software Development as well as excellent communication skills.

If necessary you'll get sufficient training and shadowing by our consultants, so that you are able to implement customer requirements in accordance with the quality requirements of our company within a defined period of time.

Primary responsibilities

- Evaluate, design, and implement Red Hat's OpenShift platform
- Assist the customer in migration of their applications to OpenShift platform
- Lead the customer within their projects for successful deliveries
- Bring innovative ideas and enthusiasm to the project team while identifying new business opportunities
- Constantly learn about new technologies and apply those concepts to customer needs

Required skills

- Experience with enterprise-wide deployments
- Experience in working with Container Technologies
- Demonstrated Know How in working with and understanding of cloud technologies
- Advanced knowledge of Linux (RHEL), including performance tuning experience, troubleshooting, bug fix updates, and core builds
- Advanced knowledge of security, system management, clustering and storage management, virtualization, and directory server
- Advanced Know how with automation tools (Ansible, Puppet...)
- Demonstrated experience communicating value, progress, and metrics of key projects to required stakeholders and diverse audiences
- Exceptional analytical and problem-solving skills
- Excellent communication and customer management skills
- Willingness to complete the Red Hat Certified Engineer (RHCE) certification within 60 days of hire
- We expect a high degree of willingness to travel

Good to have

- Advanced knowledge of OpenShift
- Advanced knowledge in Kubernetes
- Knowledge in DevOps processes and toolchains
- Experience in a Consulting role

We offer

- Working on game-changing projects at international customers
- Challenging topics in a dynamic technology stack
- An excellent working environment in a dynamic and multi-cultural team
- Trainings and education to support your personal and professional development

Based on professional qualification and experience, we offer a gross annual salary starting from EUR 50.000

We are looking forward to receiving your application!
